EXPERIENCE

Aquativa Golf Resort
Development Analyst
Full Stack Developer

Cornélio Procópio, Brazil

March 2026 – Present

January 2025 – March 2026

- Independently own every assigned project end-to-end as full-stack developer and architect, covering back end, front end, and database and making the architecture decisions for each application.
- Architected and built an in-house payment gateway integrating three banks plus credit card and Pix, processing 1,000+ monthly transactions at a 99.5% success rate.
- Designed and delivered a payment-integration API consumed by partner agencies, providing them a standardized interface to process payments through the platform.
- Built a complete restaurant management application for table reservations and activity scheduling, featuring a real-time kitchen dashboard powered by .NET SignalR to coordinate orders live.
- Integrated corporate systems (TOTVS ERP) to automate banking and operational data sync, cutting manual data entry by ~80% and eliminating data inconsistencies.
- Modernized legacy .NET REST APIs and MVC apps following DDD, SOLID, and Clean Code, improving API response times ~35%, reducing error rates ~25%, and resolving 50+ critical bugs.
- Resolve cross-department service requests as N2 technical support and supervise and mentor the team's junior developer.

Bono Energia
Systems Analyst (Mid-level)

Londrina, Brazil

July 2023 – December 2023

- Built RESTful APIs in .NET Core with WebService integration, enabling communication across 5+ internal and external systems.
- Designed and maintained SQL databases (15+ tables, 20+ optimized stored procedures), cutting query execution time ~40%.
- Implemented authentication, authorization, and data-protection policies meeting information-security standards.
- Delivered zero-downtime releases to staging and production (99.8% uptime) and contributed to 12+ sprint deliveries in a Scrum team.

Dribion Software
Technical Support

Cornélio Procópio, Brazil

January 2021 – April 2022

- Resolved 200+ technical issues monthly with a 95% first-contact resolution rate; trained 50+ clients and 10+ new hires, reducing support tickets ~30%.
- Ran SQL Server queries and QA testing, documenting 100+ bugs and supporting 30+ successful client software deployments.
- Managed electronic fiscal invoicing (NF-e, NFC-e, MDF-e, CT-e, CC-e) at 100% compliance.

EDUCATION

Technologist in Systems Analysis and Development (in progress, 6th semester)
Federal University of Technology – Paraná (UTFPR), Cornélio Procópio, Brazil · 2016 – Present

TECHNICAL SKILLS

Backend: .NET 9 (C#), ASP.NET, RESTful APIs, EF Core, Dapper
Frontend: React, Vite, Tailwind CSS, Razor (MVC)
Real-time: SignalR
Databases: SQL Server, stored procedures, triggers
DevOps: GitHub Actions (CI/CD), Docker, Portainer
Practices: DDD, SOLID, Clean Code, Software Architecture, Scrum

LANGUAGES

Portuguese — Native · English — Professional working proficiency (comfortable in interviews and meetings)
